February 15, 1980

Mr. Jack Carlstrom
1530 North Broadway
Joliet, Illinois 60431

Dear Mr. Carlstrom:

Your solid waste disposal facility located off Rock Island Avenue in Joliet was inspected on February 4, 1980, by Clarence Bieze, representing this Agency.

The inspection disclosed the following condition(s) which constitute violations of the Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board Solid Waste Rules and Regulations:

... Solid Waste received on the previous operating day did not receive cover material. By the end of each operating day, a compacted layer of at least six (6) inches of suitable natural earthen material shall be placed on all exposed solid waste.

... Leachate was observed to be flowing and seeping from the east edge of the fill area into the pit floor and drainage swale. You should take immediate action to correct this situation.

... Solid Waste was being deposited atop the fill face. Solid waste should be deposited into the toe of the fill or into the bottom of the trench unless otherwise indicated in your permit.

We suggest that you correct the aforementioned violations. A reinspection will be made in the near future to determine your progress.

Sincerely,

Kenneth P. Bechely, Northern Region Manager
Field Operations Section
Division of Land/Noise Pollution Control
